React-Native

PERSONAL PROJECTS

Atlas (06/2017 – 07/2017)

- Made an app "Atlas", which is a multiplayer game for challenging opponents with a new place name on every turn starting with the last letter of the previous place name.
- It also features locating the place entered on a Map simultaneously.
- URL : <https://github.com/deepgosalia1/Atlas>

Examination Center (04/2017 – 04/2017)

- App that can be used for scheduling the examination and seating arrangements for students during exams.

ACHIEVEMENTS

Selected for initial challenger course in Android by GOOGLE/UDACITY

Successfully completed the Applied CS with android course offered by GOOGLE
